Inland Northwest Regional Turf Spray Program

Greens – Cool Season

With this geography-specific spray program, superintendents have a customized rotation management plan for disease control. Be sure and include these important rotations in your plan and have strong, resilient turf all year long.

- Intrinsic® brand fungicides provide a strong foundation of plant health benefits, including broad-spectrum disease control, stronger roots and higher stress tolerance.
- The new, turf-safe Maxtima® fungicide is a DMI that delivers long-lasting disease control of key diseases at any temperature for rotation flexibility and year-round confidence.
- The new, broad-spectrum DMI power of Navicon® Intrinsic® brand fungicide controls more than 20 major diseases while improving overall turf health from root to blade.

Inland Northwest

Eastern WA, Eastern OR, Northern Idaho, Western Montana, Western Wyoming, and Northern Utah

This area features moderate temperatures and variable rainfall, with fall and winter being the wettest seasons. Disease pressure is highest in coastal and valley areas where irrigated turf and low mowing heights periodically provide ideal conditions for disease development. Leaf spots, patch diseases, fairy ring and snow mold are common on this region's cool-season greens, tees and fairways.

14-28
day program

Timing	Product	Active Ingredient	Rate/1,000 sq ft	Target Diseases & Benefits
1 Apr 1 ¹	Lexicon® Intrinsic® brand fungicide	Pyraclostrobin + Fluxapyroxad	0.47 fl oz	Rust, Leaf spot, Snow mold, Fairy ring ²
2 May 1	Navicon® Intrinsic® brand fungicide + Affirm™ WDG	Mefentrifluconazole + Pyraclostrobin + Polyoxin-D	0.85 fl oz + 0.9 fl oz	Leaf Spot, Brown ring patch, Necrotic ring spot, Brown patch
3 Jun 1 (Memorial Day)	Lexicon Intrinsic brand fungicide	Pyraclostrobin + Fluxapyroxad	0.47 fl oz	Broad Spectrum Disease Protection, Summer Plant Health
4 Aug 1	Maxtima® fungicide + Signature™ XTRA Stressgard®	Mefentrifluconazole + Fosetyl-AL (Aluminum tris)	0.8 fl oz + 4.0 fl oz	Anthraco-nose, Plant Health
5 Oct 1	Xzemplar® fungicide	Fluxapyroxad	0.26 fl oz	Fairy ring ²
8 Oct 15	Insignia® SC Intrinsic brand fungicide + Trinity® fungicide + Daconil®	Pyraclostrobin + Triticonazole + Chlorothalonil	0.7 fl oz + 1.0 fl oz + 3.0 fl oz	Snow mold, Winter protection

¹ Adjust first application date to reflect the onset of temperatures above 60° F.

² To improve hydrophobic conditions, make application of preferred wetting agent 1-2 weeks prior to first fungicide treatments for fairy ring.

Product timing is a suggestion only; optimize application for local weather and field conditions. Confirm active status of product registration in your state before using; not all products are registered in all states. Application Rate/1,000 sq. ft. is based on maximum label rate or range. Spray program for greens is designed to cover four acres. Plant health claims are related to root strength, stress tolerance, resiliency and growth efficiency and are specific to those BASF products containing pyraclostrobin, as shown.

Always read and follow label directions.
