## **Lexicon<sup>®</sup> Intrinsic<sup>®</sup> brand fungicide**

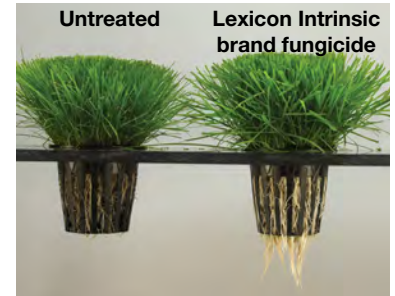

Your greens foundation when you need it most

Lexicon Intrinsic brand fungicide delivers peak disease performance under pressure and provides plant health benefits for longer, stronger roots, increased growth efficiency and greater stress tolerance. The result is a strong foundation you can count on under the toughest conditions.

Powerful Residual	Broad-Spectrum Disease Control	More Resilient Greens	Proven Plant Health Benefits
 <p>Confidently <b>control diseases</b> for up to 28 days</p>	 <p>Create a <b>perfect foundation</b> for your spray program by controlling up to 28 diseases on your greens</p>	 <p><b>Improve recovery</b> from environmental and mechanical stressors like heat, drought, heavy play and aeration</p>	 <p>Achieve <b>healthy, high-quality turf</b> with faster sod tackdown, aeration hole closure and uniform fill-in after sprigging</p>

### Lexicon® Intrinsic® brand fungicide for quick knockdown and long residual

Most fungicides on the market provide either quick knockdown or long residual. Lexicon Intrinsic brand fungicide provides both benefits. In addition to being tightly bound to the leaf's waxy surface, making it rainfast, this fungicide is redistributed to areas of the leaf that are not directly sprayed. Its unique molecular design enables Lexicon Intrinsic brand fungicide to enter the vascular system and travel within the leaf. This redistribution, along with its high level of activity, ensures long-lasting preventive and curative reliability, resulting in more consistent disease control.

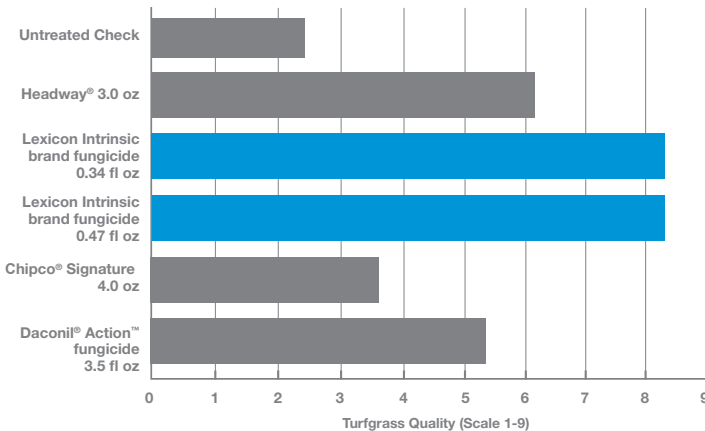

### Foundational control for peace of mind

When using Lexicon Intrinsic brand fungicide, superintendents can expect the strong, disease and stress-resistant turf, which results from using high-quality products as part of their spray programs. Research has shown that Lexicon Intrinsic brand fungicide provides excellent control of 28 key cool- and warm-season turf diseases and provides plant health benefits that improve turf fitness. Whatever the season, your turf has protection from the toughest challenges.

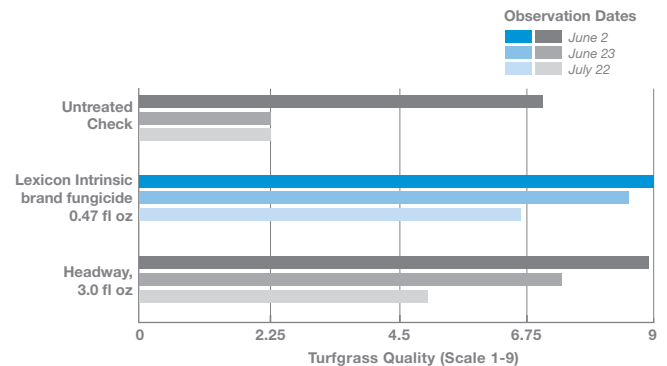

### Lexicon Intrinsic brand fungicide turf quality

Superior to competitive brands.

High turf quality demonstrates residual control of Lexicon Intrinsic brand fungicide

Rate oz/1,000 sq ft. Applications made on a 14-day interval. Rating taken on July 31, 2014. Initial application on May 8, 2014. Source: University of Missouri, 2014.

Observations as shown with last turf quality rating 28 days after last application. Applications on 21-day interval 5/13, 6/3 and 6/24. Source: Dr. Bruce Martin, Clemson University, 2014.

FRAC Group	Active Ingredients (%)	Usage Rate	Formulation	Length of Control	Packaging	Key Diseases
7 + 11	Fluxapyroxad (14.33%) Pyraclostrobin (28.58%)	0.34 - 0.47 fl oz per 1000 ft <sup>2</sup>	Suspension concentrate (SC)	14-28 days	4 x 21 fl oz	Anthracnose, dollar spot, take all root rot, fairy ring, brown patch, summer patch, Pythium diseases, spring dead spot, rapid blight
