

# Holiday Spray Program – Warm Season Guide for S-FL

The BASF Holiday Spray program is an easy-to-follow agronomic program designed to help your course thrive under the toughest conditions. Apply **Intrinsic**<sup>®</sup> brand fungicides throughout the year to protect your warm-season greens, fairways and tees from heavy disease pressure and winter stressors like reduced sunlight and cooler temperatures.

Apply Intrinsic brand fungicides to fairways, tees and surrounds ahead of aerification to protect turf from disease and summer stress. Make a second application in late summer to provide tropical storm protection and plant health foundation.

To learn more about the BASF Intrinsic Holiday Spray Program, contact your BASF representative or visit [betterturf.basf.us/holidayspray](http://betterturf.basf.us/holidayspray).

**Always read and follow label directions.**
