

Great Plains Regional Turf Spray Program

Greens Foundation Program – Cool Season

With this geography-specific spray program, superintendents have a customized rotation management plan for disease control. Be sure and include these important rotations in your plan and have strong, resilient turf all year long.

- Intrinsic® brand fungicides provide a strong foundation of plant health benefits, including broad-spectrum disease control, stronger roots and higher stress tolerance.
- The new, turf-safe Maxtima® fungicide is a DMI that delivers long-lasting disease control of key diseases at any temperature for rotation flexibility and year-round confidence.
- The new, broad-spectrum DMI power of Navicon® Intrinsic® brand fungicide controls more than 20 major diseases while improving overall turf health from root to blade.

Great Plains Greens Foundation Program

E Colorado, E Montana, E Wyoming, Kansas, Nebraska, Iowa, North Dakota, South Dakota

The Great Plains includes the steppes, valleys, plateaus and prairies east of the Rocky Mountains and north of the Rio Grande. The region experiences hot summers with dry, windy conditions in the western portions and humid, hotter conditions to the east. Winters can be harsh in some areas, with heavy snow fall and long periods of cover. Key diseases include dollar spot, brown patch, anthracnose, *Pythium*, take-all patch and snow mold.

Product timing is a suggestion only; optimize application for local weather and field conditions. Confirm active status of product registration in your state before using; not all products are registered in all states. Application Rate/1,000 sq. ft. is based on maximum label rate or range. Spray program for greens is designed to cover four acres. Plant health claims are related to root strength, stress tolerance, resiliency and growth efficiency and are specific to those BASF products containing pyraclostrobin, as shown.

Always read and follow label directions.
