

## Northern California Regional Turf Spray Program

### Greens – Cool and Warm Season

With this geography-specific spray program, superintendents have a customized rotation management plan for disease control. Be sure and include these important rotations in your plan and have strong, resilient turf all year long.

- Intrinsic® brand fungicides provide a strong foundation of plant health benefits, including broad-spectrum disease control, stronger roots and higher stress tolerance.
- The new, turf-safe Maxtima® fungicide is a DMI that delivers long-lasting disease control of key diseases at any temperature for rotation flexibility and year-round confidence.
- The new, broad-spectrum DMI power of Navicon® Intrinsic® brand fungicide controls more than 20 major diseases while improving overall turf health from root to blade.

# Northern California

## Northern California

This area features moderate temperatures and variable rainfall, with spring and fall being the wettest seasons. Disease pressure is highest in coastal and valley areas where humidity and nighttime temperatures provide ideal conditions for diseases like brown ring patch (formerly known as *Waitea*) and summer patch. Fairy ring, anthracnose, snow mold and rapid blight are also common on this region's cool season greens, tees and fairways.

14-28  
day program

Timing	Product	Active Ingredient	Rate/1,000 sq ft	Target Diseases & Benefits
1 Mar 1 <sup>1</sup>	<b>Xzemplar® fungicide</b> + Affirm™ WDG	Fluxapyroxad + Polyoxin-D	0.26 fl oz + 0.9 fl oz	Patch diseases
2 Apr 1	<b>Lexicon® Intrinsic® brand fungicide</b> + Fore® 80WP Rainshield®	Pyraclostrobin + Fluxapyroxad + Mancozeb	0.47 fl oz + 6.0-8.0 fl oz	Bermudagrass decline, Leaf spot, Brown ring patch, Take-all patch, Plant health
3 May 1	<b>Navicon® Intrinsic® brand fungicide</b>	Mefentrifluconazole + Pyraclostrobin	0.85 fl oz	Brown ring patch, Leaf spot, Plant Health
4 Jun 1 (Memorial Day)	<b>Lexicon Intrinsic brand fungicide</b> + Fore 80WP Rainshield	Pyraclostrobin + Fluxapyroxad + Mancozeb	0.47 fl oz + 6.0-8.0 fl oz	Brown ring patch, Summer patch, Fairy ring <sup>2</sup> , Rapid blight, Anthracnose, Plant Health
5 Jul 1	<b>Xzemplar fungicide</b> + Daconil®	Fluxapyroxad + Chlorothalonil	0.26 fl oz + 3.0 fl oz	Fairy ring <sup>2</sup> , Anthracnose
6 Jul 15 (Fourth of July)	<b>Lexicon Intrinsic brand fungicide</b>	Pyraclostrobin + Fluxapyroxad	0.47 fl oz	Anthracnose, Summer Plant Health
7 Aug 1	Segway®	Cyazofamid	0.9 fl oz	<i>Pythium</i>
8 Sep 1	<b>Maxtima fungicide</b> + Signature™ XTRA Stressgard®	Mefentrifluconazole + Fosetyl-AL (Aluminum tris)	0.8 fl oz + 4.0 fl oz	Anthracnose, <i>Pythium</i>
9 Oct 1 (Labor Day)	<b>Lexicon Intrinsic brand fungicide</b>	Pyraclostrobin + Fluxapyroxad	0.47 fl oz	Take-all patch, Bermudagrass decline, Spring dead spot, Plant Health
10 Oct 15	<b>Trinity® fungicide</b> + 26GT® + Medallion®	Triticonazole + Iprodione + Fludioxonil	1.0 fl oz + 4.0 fl oz + 0.5 fl oz	Snow mold

<sup>1</sup> Adjust first application date to reflect the onset of temperatures above 60° F.

<sup>2</sup> To improve hydrophobic conditions, make application of preferred wetting agent 1-2 weeks prior to first fungicide treatments for fairy ring.

Product timing is a suggestion only; optimize application for local weather and field conditions. Confirm active status of product registration in your state before using; not all products are registered in all states. Application Rate/1,000 sq. ft. is based on maximum label rate or range. Spray program for greens is designed to cover four acres. Plant health claims are related to root strength, stress tolerance, resiliency and growth efficiency and are specific to those BASF products containing pyraclostrobin, as shown.

Always read and follow label directions.
