

Encartis™

Fungicide

Power from start to finish

Introducing Encartis™ fungicide, a powerful dual-active fairway solution that provides long lasting, preventive and curative protection from dollar spot and ten other key foliar diseases, allowing you to start and finish your season strong.

 **BASF**

We create chemistry

Excellent Pre-mix Formulation	28-Day Fairway Residual	Dual-Active Means Preventive + Curative	Start Early. Finish Strong.
 <p>Our unique BASF formulation was created to mix quickly and easily, ensuring no settling out in the tank</p>	 <p>Your fairways will be protected for up to 28 days from dollar spot while providing a solid defense against other foliar diseases</p>	 <p>Strong preventive defense and fast curative activity with two modes of action to break the risk of resistance development</p>	 <p>The ultimate fairway solution to help you start and finish your season disease free</p>

Two proven, hardworking ingredients in one powerful solution

Encartis™ fungicide pairs the strength of boscalid (the active ingredient in Emerald® fungicide) and chlorothalonil in the perfect ratio to provide preventive and curative activity on warm- and cool-season turf.

The advanced dual-active solution gives powerful, long lasting control for up to 28 days and helps you maintain healthier, disease-free playing conditions.

While perfect for fairways, Encartis fungicide can be used anywhere on the golf course, including tees and greens, any time of the year to control key diseases.

Controls 11 diseases: algae, anthracnose, bentgrass dead spot, brown patch, copper spot, dichondra leaf spot, dollar spot, gray leaf spot, leaf spot (melting-out, brown blight), red thread and stem rust.

“Encartis [fungicide] is an outstanding fungicide premix and always performed very well in trials at Clemson. The combination extends the spectrum of diseases controlled while providing defense against selection of resistant fungal strains. I am glad to see this product added to turf managers’ tools for disease control.”

Dr. Bruce Martin
