

day program

New England

Connecticut, New Hampshire, New York, Massachusetts, Maine, Rhode Island and Vermont

Depending on seasonal weather conditions, heavy disease pressure begins in May and ends around October in this area. Connecticut, Rhode Island and Massachusetts generally bring heavier disease pressure than do Maine, New Hampshire and Vermont in season. On fairways, dollar spot is an issue throughout the season, while *Pythium*, summer patch and fairy ring focus more heavily in the summer months.

	Timing	Product	Active Ingredient	Rate/1,000 sq. ft.	Key Diseases & Benefits
1	Apr 1	Maxtima® fungicide + Chipco® 26GT®	Mefentrifluconazole + Iprodione	0.4 fl oz + 4.0 fl oz	Dollar spot, Leaf spot
2	Apr 21	Encartis [™] fungicide	Boscalid + Chlorothalonil	3.5 fl oz	Dollar spot, Leaf spot, Pink snow mold
3	May 15	Insignia® SC Intrinsic® brand fungicide + Secure®	Pyraclostrobin + Fluazinam	0.7 fl oz + 0.5 oz	Dollar spot, Summer patch, Fairy ring, Plant health
4	Jun 7	Xzemplar⊚ fungicide	Fluxapyroxad	0.26 oz	Dollar spot, Brown patch, Summer patch, Fairy ring

10	Nov 1	Secure	Fluzinam	0.5 fl oz	Dollar spot
11	Nov 15	Insignia SC Intrinsic brand fungicide + Chipco 26GT	Pyraclostrobin + Iprodione	0.7 fl oz + 4.0 fl oz	Snow mold, Plant Health

Product timing is a suggestion only; optimize application for local weather and field conditions. Confirm active status of product registration in your state before using; not all products are registered in all states. Application Rate/1,000 sq. ft. is based on maximum label rate or range. Plant health claims are related to root strength, stress tolerance, resiliency and growth efficiency and are specific to those BASF products containing pyraclostrobin, as shown.

Always read and follow label directions.
