## Southeastern US Regional Turf Spray Program

### Bentgrass Greens – Cool Season

With this geography-specific spray program, superintendents have a customized rotation management plan for disease control. Be sure and include these important rotations in your plan and have strong, resilient turf all year long.

- Intrinsic® brand fungicides provide a strong foundation of plant health benefits, including broad-spectrum disease control, stronger roots and higher stress tolerance.
- The new, turf-safe Maxtima® fungicide is a DMI that delivers long-lasting disease control of key diseases at any temperature for rotation flexibility and year-round confidence.
- The new, broad-spectrum DMI power of Navicon® Intrinsic® brand fungicide controls more than 20 major diseases while improving overall turf health from root to blade.

# Southeastern US Bentgrass Greens

Alabama, Georgia, North Carolina,  
South Carolina and Tennessee

This region features a mostly temperate climate but can be moist and cold in the winter and hot and humid in the summer. The wet conditions usually last a short time, the result of storms in the Gulf or Atlantic, and arctic storms from the Great Plains. In winter months, temperatures range from around freezing at night to highs in the 50s to 70s in the daytime. Summer heat often rises above 100 degrees for short periods.

Multiple products listed per month are meant to be a rotational option to control additional disease pressure that may occur.

<sup>1</sup> SLR = Standard Local Rate for the products shown; consult local extension recommendations in your region.

<sup>2</sup> Honor Intrinsic brand fungicide can also be used to provide disease control and plant health. Honor is applied at 1.11 oz / 1000 sq ft.

Product timing is a suggestion only; optimize application for local weather and field conditions. Confirm active status of product registration in your state before using; not all products are registered in all states. Application Rate/1,000 sq. ft. is based on maximum label rate or range. Plant health benefits related to root strength, stress tolerance, resiliency and growth efficiency are specific to those BASF products containing pyraclostrobin.

Always read and follow label directions.
