**SCIENCE**

When it comes to turfgrass performance, you expect greatness because greatness is the expectation. Intrinsic<sup>®</sup> brand fungicides have set the gold standard by delivering results that help superintendents take their courses to the next level. As the first fungicide brand that officially achieved EPA approval for its plant health benefits, these foundational products give you the power to control disease, enhance growth and grow more resilient turf from the roots up.

**SUPERIOR  
DISEASE CONTROL**

Intrinsic brand fungicides inhibit mitochondrial respiration in fungi, preventing disease from spreading so your turf can preserve energy and thrive while **controlling up to 28 of the toughest turfgrass diseases with up to 28-day residual.**

**INCREASED  
GROWTH EFFICIENCY**

Intrinsic brand fungicides maximize the photosynthetic process of turfgrass, **helping your turf grow stronger and more resilient from the inside out compared to turf treated with competitive products.**

**ENHANCED  
STRESS TOLERANCE**

Turfgrasses treated with Intrinsic brand fungicides **grow dramatically longer, denser root systems than the competition,** improving the resilience of your course in the face of environmental stress, such as heat, cold and drought, and mechanical stress, such as aeration.

**TURF THAT'S SECOND BEST WON'T CUT IT. YOUR GOAL IS TO  
BE THE GREATEST OF ALL TURF**

BUILD A FOUNDATION OF
