

We create chemistry

Pylex® Herbicide

Powerful Post Action

Unmatched control of difficult-to-eliminate target weeds including goosegrass and bermudagrass, flexible utility across cool- and warm-season turf and no-wait reseeding schedule make up the ultimate tank mix partner for enhanced control of grassy and broadleaf weeds.

Learn more

Selective POST Activity	Superior Goosegrass Control	Premium Tank-Mix Partner	Enhanced Seasonal Utility
			
Advanced postemergent control of grassy & broadleaf weeds in turf	Highly effective goosegrass control, even at very low use rates	Easily mixes with other herbicides to maximize efficacy and residual control	Flexible use rates and application timings extend utility across turf types

Advantages of Pylex® herbicide

- Absorbed by leaves, roots and shoots to quickly control target weeds
- Increased application utility with seasonal timings and no-wait reseeding intervals
- Flexible use rates for improved tolerance across turf types: creeping bentgrass, bermudagrass, Kentucky bluegrass, centipedegrass, fine fescue, tall fescue, seashore paspalum and perennial ryegrass

Seasonal use patterns

- Apply summer through fall for crabgrass, grassy weeds and broadleaf weed control
- Apply in summer for improved goosegrass control
 - In bermudagrass turf: Use 0.25fl oz to 0.5fl oz / A
 - In bentgrass stands: Use 0.25 fl oz / A
- Apply in late summer to early fall for selective bermudagrass removal from cool-season turf and centipedegrass

Before **Pylex** herbicide

After **Pylex** herbicide

Turf best use recommendations

- Include crop oil concentrate (COC) or a methylated seed oil (MSO) to achieve consistent weed control
- Apply as broadcast or spot treatment and withhold mowing for 2 days following application
- Tank-mix with **Drive® XLR8** herbicide for improved control of crabgrass and other grassy weeds
- Tank-mix with **Tower®** herbicide or **Pendulum® AquaCap** herbicide for extended residual control

See product label for full use instructions

Selective bermudagrass removal

Photos showing cool-season release in treated area and dormant Bermuda encroachment in non-treated surrounds.

HRAC group	Active ingredient	Usage rate (per acre)	Formulation	Packaging	Key weeds controlled
27	Topramezone (29.7%)	0.25 to 2fl oz / A	Suspension Concentrate (SC)	4 x 4 fl oz	Goosegrass, bermudagrass, crabgrass, dallisgrass, clover, and oxalis
